

Get Out While You Can

Mipso

Last night I heard the rain come down
Stepped outside, opened up my mouth
I've tried my best to leave this lonely Piedmont town
Where I hear the rain come down

Now I know some things, they never wash away
Sink into your fingertips and stain
I wanna take you with me
But it's better if you stay
'Cause some things never wash away

I will fall into your open arms tonight
I will whisper in your ear, everything will be alright
I will count the hours and hope you will understand
I will do the best I can
To get out while I still can

No flame could heat this old house
It's cold inside, new flames burn out
You can cup a fragile match, but walk softly now
'Cause no flame could heat this old house

I will fall into your open arms tonight
I will whisper in your ear, everything will be alright
I will count the hours and hope you will understand
I will do the best I can
To get out while I still can

Get out while you can
Get out while you can
Get out while you can
Get out while you can

Get out while you can
I hear the rain come down
Get out while you can
Get out while you can
I hear the rain come down
Get out while you can
Get out while you can
I hear the rain come down
Get out while you can
Get out while you can
I hear the rain come down
Get out while you can
