Oceans

Mipso

Remember when the word got out and it was gone
I went running down to the beach
It was true, there was silence all around
And dry sand far as I could see

They say in time it will get easier
They say you'll figure it out in a while
But I was born in a world with oceans
And now I am ready to die

Remember when the sky got dark and we were young
It was war up above
And i'd hold you again as I [?]
We just kept on making love

They say in time it will get easier
They say you'll figure it out in a while
But I was born in a world with oceans
And now I am ready to die
To die

The trials of dancing, on the wind like little doves
Maybe they'll just pick up and go
Come back again someday with white caps in their eyes
But I'll be sleeping soft and long

They say in time it will get easier
They say you'll figure it out in a while
But i was born in a world with oceans
And i'm ready to die

They say in time it will get easier
They say you'll figure it out in a while
But i was born in a world with oceans
Now, i'm ready to die
