

Break Of Dawn

Miracle Of Sound

Nebulas align
Yearnings intertwined
A golden age in ashes once again
Under stirring stars
In the burning shards
Kindle fragments of a fallen reign

So look to the break of the dawn
To the break of dawn
Stronger together now
We were never gone, gone gone
Look to the break of dawn
To the break of dawn
My friends
Come on, come on, come on
Light up the black

You're gonna
Bring the light back
Bring the light back
Bring it right back

Through coronas wide
Supernovas die
Fractured in the fateful fall of man
Feel the hard regime
Of a strength unseen
Unity will bring the upper hand

So look to the break of the dawn
To the break of dawn
Stronger together now
We were never gone, gone gone
Look to the break of dawn
To the break of dawn
My friends
Come on, come on, come on
Light up the black

You're gonna
Bring the light back
Bring the light back
Bring it right back

Fly another path of sacrifice
Face another fallen paradise
We were never gone just down & out
Just another silent prison
Ride into the cataclysm
Burn away the panic and the doubt

So look to the break of the dawn
To the break of dawn
Stronger together now
We were never gone, gone gone
Look to the break of dawn
To the break of dawn

My friends
Come on, come on, come on
Light up the black

You're gonna
Bring the light back
Bring the light back
Bring it right back
