

Upside Down

Miracle Of Sound

When night is falling
And all the lights they flicker, fade
Reflections crawl through the mirrors
A distant calling
A hum inside the current's phase
The silent sprawl ever nearer
It's in the cracks in the walls
Always watching you
Into the black ever fall

When everything is upside down
When you're yelling but you make no sound
Life is gonna spin you round
Oh and get a little bit stranger
And when everything is upside down
A tremor in the underground
The nights are gonna take this town
Oh and get a little bit stranger
Stranger

Push the kinetics
A troubled spirit breaking through
A bitter debt to repay now
But don't you dread it
A friend would never lie to you
Helping you get through the pain now
And when everything is upside down
When you're yelling but you make no sound

Life is gonna spin you round
Oh and get a little bit stranger
When everything is upside down
A tremor in the underground
The nights are gonna take this town
Oh and get a little bit stranger
Stranger

Lost in the spaces behind
Hold out a hand in your mind
Don't have to face it alone
It's in the spaces behind
Ever watching you
It's in your sight when you're blind

And when everything is upside down
When you're yelling but you make no sound
Life is gonna spin you round
Oh and get a little bit stranger
When everything is upside down
A tremor in the underground
The nights are gonna take this town
Oh and get a little bit stranger
Stranger

Lost in the spaces behind
Hold out a hand in your mind
Don't have to face it alone
