## **Dear Old Sun**

## **Miranda Lambert**

Dear old sun How you holding up Through the winter cold Up there all alone February's been hard on a heart But we're near the end And it's almost march Though the sky's been grey And in our way I still see your light

Well, you melt the snow And you grow the roses And you dry the tears And you freckle noses Our little world Revolves around you Coming up and going down

000000

Dear old sun Lets call it a day And I watch you set I'll let you rest But wait for you At mornings due Till I see your light

000000

I still see your light I still see your light Heaven shining down tonight I still see your light

I still see your light I still see your light Heaven shining down tonight I still see your light
