Life's been cold sometimes, but the night still keeps us thrill
ed at night
All they wanna do is to keep our mouths shut
However, we ain't gonna stop the run, no, never
I needed to find a way out that didn't care about what happened
to me
'Cause the night's still long, right?
Thought only I could change my life
No one could do it for me
But then, I found you
I felt so many emotions from you
Which is crazy
I was like
How on earth could there be this much feelings that I've not le
arned?
I don't know how you taught me all these ones
Crazy
Are you gonna make me bad for the rest of my life?
When are you gonna strong me from being fascinated?
I had no fear
Got nothing to lose too
But then
I'm not sure though
'Cause you make me feel like

Got me feeling like I'm in fantasy
Bite me like it's a piece of cake
All day, all night, tell me honestly
I just want you
I just want you
