The Black Hole

The Misfits

Feel the pull of gravity
As light gets stripped away
All the endless colors
All turn a shade of grey

I know there's something out there
Something we ain't seen
Something undiscovered
A nightmare or a dream

But soon we'll know
Lock controls
And set course into,

The Black Hole
We show an earlier distress code
Of a mission still missing
It goes far beyond the reaches
Of this world, to the unknown

Catapult our universe
Uncharted outer space
Here we are the aliens
An unknown threatening race

I know there's something out there
Someplace we ain't been
Collision course with destiny
Or the end of everything

But soon we'll know
Lock controls
And set course into,

The Black Hole
We show an earlier distress code
Of a mission still missing
It goes far beyond the reaches
Of this world, to the unknown

We show an earlier distress code
Of a mission still missing
It goes far beyond the reaches
Of this world
To the unknown
Through the Black Hole
