

Hearts on Fire

Miss Fortune

I went through hell for your entertainment
Nothing you could say could make me afraid, yeah
When times were tough, I thought I would make it
I've come so far just to be complacent now

You tried to scandalize my name
(Make a vandal out of me)
In spite of everything, my heart's still on fire

You tried to suffocate the flame
(You shoot your shot but you can't aim)
In spite of everything, my heart's still on fire

To say I went through hell is an understatement
You tried to outline me in chalk on the pavement
I'm stronger now; it hurts you to say it
I've come too far just to be complacent now

I've come too far just to be complacent now

You tried to scandalize my name
(Make a vandal out of me)

In spite of everything my heart's still on fire

You tried to suffocate the flame
(You shoot your shot but you can't aim)
In spite of everything my heart's still on fire

You've fought malevolently
You failed in misery
When the dust clears
You're in my cross hairs
In the end just a casualty

You've fought malevolently
You failed in misery
When the dust clears
You're in my cross hairs
In the end just another casualty

You tried to scandalize my name
(Make a vandal out of me)
In spite of everything my heart's still on fire

You tried to suffocate the flame
(You shoot your shot but you can't aim)
In spite of everything my heart's still on fire
