

# The Way You Are Tonight

Missy Higgins

All the faces in the crowd  
All the singing long and loud  
Celebrations on the midnight clear  
Set the world alight

All the fire in the sky  
I can see it in your eyes  
And I could love you for a thousand years  
The way you are tonight

The way you hold me  
The way you sing along  
Find a way to make me feel so good  
Whenever else is wrong

There are times I get to see  
All the things you mean to me  
I could love you for a thousand years  
The way you are tonight

See all the tired faces  
Going on their way  
And in the east there's just the palest line  
That shows the coming of the day

As it breaks across the sky  
I can see it in your eyes  
I could love you for a thousand years  
The way you are tonight

As it breaks across the sky  
In the closing of your eyes  
I could love you for a thousand years  
The way you are tonight
