

Do this one just for you
And your head's held low underneath the truth
When you can't cut yourself loose
From the pain that's wrapped around your neck like a noose
You got that glitter and gold running through your veins
Hasn't anyone told you?
Crown comes to life in your sound
Don't bite your tongue, let your words ring out

'Cause I've walked through fires and danced upon my own broken
heart
Piece myself back together every time I fall apart
'Cause I've won hands over again with least favored pair of car
ds
7-2, I'll always love you 'cause you got me so damn far

(7-2)

Scars decorate your skin like freckles in the summertime
Remind you where you have been to keep your chin up towards the
sky
Keep shattering the ceiling even when your knuckles bleed
'Cause you've got that fight in your blood that'll make a grown
man weep

'Cause I've walked through fires and danced upon my own broken
heart
Piece myself back together every time I fall apart
'Cause I've won hands over again with least favored pair of car
