

# armageddon

Mitch James

If this could be the end  
Then at least I'm with a 10  
Outta all your pretty friends  
You're the one I want

There could be a war  
At our door  
But baby don't blame me  
If you're all I see  
Then the day after  
A natural disaster  
Oh baby I'm sorry  
Guess I missed that beat

It's just you and I  
And baby armageddon you tonight

If this could be the end  
Then at least I'm with a 10  
Outta all your pretty friends  
You're the one I want  
Angels calling from the sky  
Guess that's it for you and I  
Til' we have to say goodbye  
You're the one I want

There could be devastation  
A tidal wave across the nation  
A panic in the world  
You're always my girl  
You don't need no explanation no

That feeling won't disappear  
Like smoke all in the atmosphere  
And even though I can't breathe  
I know you're right here with me

It's just you and I  
And baby armageddon you tonight

If this could be the end  
Then at least I'm with a 10  
Outta all your pretty friends  
You're the one I want  
Angels calling from the sky  
Guess that's it for you and I  
Til' we have to say goodbye  
You're the one I want
