

Nobody Else

Mitch James

All I know
Life goes fast but we're still taking it slow
No matter how many times I go and get messed up
You dress up
And act like I done nothing wrong at all

I know you see
The little things that make you wanna believe
And we both know that it goes deeper than flowers
It's the hours when no ones there and it's just you and me

When we grow older
I want you next to me
Mm
Cause where you are love
That's where I wanna be
Mm

Nothing left, just candlelight
A hundred thousand stars all passing by
But I don't see nobody else, nobody else but you
And if we only had tonight
I'd never let you go, let you out my sight
Girl I don't see nobody else, nobody else but you

And all I can say is
No matter what comes our way we gonna make it
Even the sky is falling down, I know
That you and I can do this on our own

When we grow older
I want you next to me
Oh
Cause where you are love
That's where I wanna be
No

Nothing left, just candlelight
A hundred thousand stars all passing by
But I don't see nobody else, nobody else but you
And if we only had tonight
I'd never let you go, let you out my sight
Girl I don't see nobody else, nobody else but you
