

See you up above
Spinning in the air
Your eyes are filled with fire
Will you take me there?
We could find a place
That we could call our home
Oasis in the clouds
We could be alone

See you up ahead through the dark night
Kiss you on the mouth make your eyes wide
Get away from here
Hold you in my arms pull you in tight
Jumping off the edge with our arms wide
We could disappear

We can leave tonight
Escape all the fears
Get out to a place where only you and I exist
Put your hand in mine
Swear you won't let go
I could take the world with just your lips to call my home

See you up ahead through the dark night
Kiss you on the mouth make your eyes wide
Get away from here
Hold you in my arms pull you in tight
Jumping off the edge with our arms wide
We could disappear
