

## When I'm With You

Mo Pitney

Your folks were watching TV before we went outside  
A show about all the places you should see before you die  
I was thinking maybe someday it'd be nice if I could take a trip like that

But sitting in these lawn chairs out here in your backyard  
Surrounded by corn fields underneath the stars  
I can't imagine any place out there that beats sitting where you're at

'Cause when you smile, I'm on vacation  
In these wild and crazy places  
When I could sit right here and feel like I'm somewhere  
When I'm with you

I spend most my time working just like everybody else  
But baby, all I work for is to have you to myself  
And when I need a getaway, I drop everything and I go straight to you

'Cause when you smile, I'm on vacation  
In these wild and crazy places  
When I could sit right here and feel like I'm somewhere  
When I'm with you

Someday we'll go  
But girl, 'til I can take ya there  
I just want you to know

When you smile, I'm on vacation  
But who needs wild and crazy places  
When I could sit right here and feel like I'm somewhere  
When I'm with you  
Yea, when I'm with you
