

# Vildchild

MØ

Yeah

I see you breakdancing naked on the bar  
Never ashamed of your scandalous heart  
I see your fingernails lighting up the dark  
And I think you're greater than Virginia and Mozart

Baby, you're a wild child  
You try to lie, but you tell the truth  
Oh, my wild child, got the music in you  
I know your corners get dark  
Always so misunderstood  
Oh, my wild child, please come take me with you

Please come take me with you

Last time I saw you, you were sleeping in the park (You were sleeping in the park)  
You got no money, but you got the spark  
The world keeps turning, I was turning, turning with it (Turning, turning, I was with it)  
But I don't know who I would have been without you living in it, oh

You were born under a total eclipse, yes  
Your heart is warm though you've stood through some rough shit  
I'll dance with you to the edge of the night (To the edge of the night)  
Yeah, I know I left you, but you're always on my mind

Baby, you're a wild child  
You try to lie, but you tell the truth  
Oh, my wild child, got the music in you  
I know your corners get dark  
Always so misunderstood  
Oh, my wild child, please come take me with you

Take me with you  
Please come take me with you  
Take me with you

Then the morning comes and  
You say I should "step my pussy up" (Yeah)  
I say "I'll try not to fuck it up" (Try not to fuck it up)  
And I'll blush, but I fumble (Yeah)  
Oh god, I'm such a fumbler  
Jeg siger "jeg savner hordan det var" (Yeah)  
Du siger "fuckit baby, du jo blevet pop star!"  
That's right (Yeah), I havn't lived your life  
You say: "don't cry, it's all a dream but at least we're both in it"

Baby, you're a wild child  
You try to lie, but you tell the truth  
Oh, my wild child, got the music in you  
I know your corners get dark  
Always so misunderstood  
Oh, my wild child, please come take me with you

Take me with you

Please come take me with you  
Take me with you

('Cause I'm just like you)
