You're trying to hold me down
You're trying to hold and switch off like before
Thinking you could be ignored
There's a the way you're stalking me
You could steal from my heart
And my head like once before
Never mind, I'm tired of being bored

You can't crawl within my heart no more

She's so quick to fix
All you've wasted and conquered
The cost of the riches counts too much
Don't you ever learn

He's so quick to fix
Fully completely bunkered
The guns of the rich will fight till life's given no return

You're so quick to fix
All the lies that you're gonna hurl
The guns of the rich blastin' down all the bitter poor

I'm fightin' and holdin' on
I'm trying to hold and switch off like before
Wishing I could be adored
You control, you're the enemy
Use the beat of my heart
To give yourself a sight of joy
Slowly building, only to destroy

You can't crawl within my heart no more

She's so quick to fix
All you've wasted and conquered
The cost of the riches counts too much
Don't you ever learn

He's so quick to fix
Fully completely bunkered
The guns of the rich fight till life's given no return

You're so quick to fix
All the lies that you gonna hurl
The guns of the rich blastin' down all the bitter poor

She said you don't know
You can fool all the others
Death to real love
I'm rising high above
Oooh, it's a long way back
You can fool all the others
Stranded, out of love
Your holy fire is burnin' low

You can fool all the others
Fool them all you want

I don't wanna know

Lord, I believe the hype
Who's gonna save your love
Who's gonna save you
Now you gotta figure it out
Lord, I believe the hype
Who's gonna save your love
Who's gonna save you
Now I gotta figure it out
