

## The Low Road

Mobile

This city's always quiet when the storms about to blow  
This city's got a hold on me that I'll spin out of control  
Takin' a ride to the edge of town  
I'm on the run, I'm on the run  
Takin' a ride to the edge of town  
I'm the only one, I'm the only one

Take the low road  
Take the low road  
I'll never come back around no more  
Take the low road  
Take the low road  
I'll never come back around here

This is my last and only chance  
This is my one and only chance to get away

Takin' a ride to the edge of town  
My life is torn, my life is torn  
Takin' a ride to the edge of town  
The past is gone, the past is gone  
And when the day bleeds through the night  
My hopes are dying with the light  
Once again I realize  
How bad I made a mess of my life

Take the low road  
Take the low road  
I'll never come back around no more  
Take the low road  
Take the low road  
I'll never come back around here

This is my last and only chance  
This is my one and only chance to get away

Take the low road  
Take the low road  
I'll never come back around no more
