

wild flame

Moby

They ask you what's the use
But they don't think you're used to walking
Bare feet on concrete ground
Now you're running out of time
You're hungry for still blue eyes
'Cause they found an ocean inside you
You're lagging on that road
The fork that splits down towards you
But you got a one night
To find out where you're going
Said you got a one night
I bet you wanna light it up
One night

Are you really gonna play that part?
You're gonna change it up
Before it's too late

Said you wanna light it up like a wild flame
Light it up like a wild flame
Said you wanna light it up
Said you wanna light it up

Dancin' between two homes
In this black body
Limbo dance
Two fishes swimming up sea
Talking pop culture
Talking
Talking double identity
Invisible borders blowing in the wind
Dangling beauty on string
Dangling beauty on string

In their eyes, you're a dancing queen
Will you die just for them to live?
Shaggin', jivin', they eat you whole
How much of yourself do you have left?
If you burn your castle to the ground
What's the war and all the things?
Pick your grind with everything you've got
Ooh, yeah

They said you've got one night
Are you really gonna play that part?
You're gonna change it up before it's too late

Said you wanna light it up like a wild flame
Light it up like a wild flame
You said you wanna light it up
You said you wanna light it up
You said you wanna light it up
You said you wanna light it up
You said you wanna light it up
