

# You

Moby

Won't see your face in the mirror  
Won't stand it at all  
I'm seeing, I've been clearer  
When I figured it out

In my life I dream about you  
You're everything, everything I wanted too  
And now I'm waiting for lover to come along  
Don't want to talk with another, won't that be long

In my life I dream about you  
You're everything, everything, I wanted you  
I met someone but I want you  
And now I only stand and fall for you love

Love, love, say give love  
When might I look so clearly  
I need a, "Known"  
When darkness comes to me I would live alone

In my life I dream about you  
You're everything I wanted, wanted you  
In my life I dream about you  
Well, in my dream I need only you

You're everything, everything I wanted too  
I met my love and it was you, you, you, my love  
In my life I dream about you  
Well, if I'd sleep I'd see only you

You're everything, everything I wanted you  
I need my loving falling from you, your love
