When the Moonlight Shines

Mocca

When the moonlight shines
all the stars are smiling
Now the time has come
You leave me all behind

I'm not feeling fine
I am feeling down
When the moonlight smiles
With his pearly smile

I think it's very funny
How does life can be
And once you appear with the grind

And now you really left me
With no one to hold me
As time goes by I will drown

I think it's very funny
How does life can be
And once you appear with the grind

And now you really left me
With no one to hold me
As time goes by I will drown

When the moonlight shines
all of stars are smiling
Now the time has come
You leave me all behind
