

# I Remember Way Too Much

Mod Sun

I remember waiting for the sun to rise  
I remember where we went wrong that night  
I remember way too much  
I remember way too much  
I remember waiting for the sun to rise  
I remember where we went wrong that night  
I remember way too much  
I remember way too much

Ay

I remember when we wished we were older  
I remember how we felt late October  
"I'll always keep you warm" is what I told her  
"I'll always keep you warm" is what I told her  
I remember wishing on a four leaf clover  
And writing your name all over my folders  
"I'll always be around" is what I told her  
"I'll always be around" is what I told her

I remember waiting for the sun to rise  
I remember where we went wrong that night  
I remember way too much  
I remember way too much

I remember waiting for the sun to rise  
I remember where we went wrong that night  
I remember way too much  
I remember way too much  
I remember waiting for the sun to rise  
I remember where we went wrong that night  
I remember way too much  
I remember way too much

And you know I could never forget  
All the trouble me and you got in  
In the summer of 2006  
Baby you know I could never forget  
I remember sneaking out and coming over  
I remember freaking out, I wasn't sober  
"I hope I end up with you" is what I told her  
"I'm gonna end up with you" is what I told her

I remember waiting for the sun to rise  
I remember where we went wrong that night  
I remember way too much  
I remember way too much

I remember waiting for the sun to rise  
I remember where we went wrong that night  
I remember way too much  
I remember way too much  
I remember waiting for the sun to rise  
I remember where we went wrong that night  
I remember way too much  
I remember way too much

I remember way too much

Is what, is what I told her
