

# Painkiller

Mod Sun

You're a easy pill to swallow  
My water was so shallow  
You made my heart so full, before you it was hollow...  
What a cheap cheap trick  
We all know loose lips sink ships  
You're the poison that I sip, but I can't get enough of it...  
Be my little painkiller

Say something, say something  
I'll let you get away with anything  
Blood rushing, blood rushing  
Running through my veins like amphetamine  
We'll make it out, eventually...  
So say something, say something  
I'll let you get away with anything  
Be my little painkiller

Take the lead and I will follow  
You make me wanna see tomorrow  
Live in ecstasy right next to me, you're the message in a bottle  
Maybe I'm an optimist  
Take my oxygen with every kiss  
That you left upon my lips, and I can't get enough of it...  
Be my little painkiller

Say something, say something  
I'll let you get away with anything  
Blood rushing, blood rushing  
Running through my veins like amphetamine  
We'll make it out, eventually...  
So say something, say something  
I'll let you get away with anything  
Be my little painkiller
