

Wolves

Mod Sun

And I will protect you

I rip my heart out of my chest (My chest)
And hand it to you in your brand new dress
I'm sorry (Sorry) if I spill blood all over you (Blood all over
you)

I saved time today by crying about two things at once
I think about your face, I'm covered in goosebumps

Full of chills
I'm so thrilled (So thrilled)
To see a smile on your face (Smile on your face)
It's my aim (It's my aim), and your name is on my body

I saved time today by crying about two things at once
I think about your face, I'm covered in goosebumps

And I will protect you (Protect you)
From the wolves outside of your window (Window)
From the place you fear the most
When you're down and out and losing hope
Yes, I will protect you (Protect you)
From the wolves outside of your window (Window)

And I'm a fuck-up but I do my best (Do my best)
You're so perfect and I'm such a mess
I'm sorry (Sorry), I'm never big enough for you (Big enough for
you)
For you, for you, ooh

I saved time today by crying about two things at once
I think about your face, I'm covered in goosebumps

And I will protect you (Protect you)
From the wolves outside of your window (Window)
From the place you fear the most
When you're down and out and losing hope
Yes, I will protect you (Protect you)
From the wolves outside of your window
From the wolves outside of your window
