

# Sunny Places Shady People

## Modern Day Escape

Out at night  
We come alive  
A devil on our shoulder  
And blood shot eyes  
You better watch your step  
You better watch your back  
I got a bad reputation

Like a family  
Love is what we bring  
Unless you're condescending  
Then you can never hide  
This is more than pride  
This is my only decree

This is the city I love  
This is a city I breathe  
Built me from the inside out  
My destiny  
It lies between  
False hope and travesty

You can burn me alive  
You can take my eyes  
This love is never ending  
This is the city I need  
We are the city that bleeds  
Build me from the inside out

Out like wolves, we are preying on good times  
Through the forest, we will eat you alive  
Out like wolves, we are preying on good times  
Through the forest, we will eat you alive

You better watch your step  
You better watch your back  
We got a bad reputation  
Like a family  
Love is what we bring  
Unless you're condescending  
Then you can never hide  
This is more than pride  
This is my only decree

This is the city I love  
This is a city I breathe  
Built me from the inside out  
My destiny  
It lies between  
False hope and travesty

You can burn me alive  
You can take my eyes  
This love is never ending  
This is the city I need  
We are the city that bleeds  
Build me from the inside out

And I know some way, some how  
I'll make them see  
And I know some way, some how  
They won't beat me  
Cast out about a million times  
All the lights they flash, but they never shine  
And I know some way, some how  
I'll make them see me

This is the city I love  
This is a city I breathe  
Built me from the inside out  
My destiny  
It lies between  
False hope and travesty

You can burn me alive  
You can take my eyes  
This love is never ending  
This is the city I need  
We are the city that bleeds  
Build me from the inside out

Out like wolves, we are preying on good times  
Through the forest, we will eat you alive  
Out like wolves, we are preying on good times  
Through the forest, we will eat you alive
