

Call Me

Modern English

Call me when you want your favour back
Call me when you're in the mood
If you need me take the knife out of my back
There's something maybe we can do

Call me when you're off your mother's milk
Call me when you need to be alone
If you only just want to feel intact
Call me when you're in the mood

Where'd you get yourself that body bag?
Did you find it all too soon?

Call me when you're off your mother's milk
Call me when you need to be alone
If you only just want to feel intact
Call me when you're in the mood

Call me when you're off your mother's milk
Call me when you need to be alone
If you only just want to feel intact
Call me when you're in the mood

Call me when you want your favour back, just call me
If you need me take the knife out of my back, just call me
[repeat to fade]
