

Here Comes the Failure

Modern English

Here comes the failure
Brushed against my skin
There's so much in my size
I've stolen everything

Here comes the failure
On top of everything
A simple, simple saviour
It's worth believing in

Consciously you've seen me
Tripping through the wire
That's some boring procedure
Of several inches high

Here comes the failure
On top of everything
A simple, simple saviour
Close against my skin
Close against my skin

A piece of me is missing
Somewhere over there
Deep inside the water
In need of some repair

Here comes the failure
On top of everything
A simple, simple saviour
Close against my skin
Close against my skin
Close against my skin
Close against my skin

Here comes the failure
On top of everything
A simple, simple saviour
Close against my skin
The needle sharp as sin

Here come the failure (here comes the failure, here comes the failure)
[repeat to fade]
