

The Border

Modern English

Temperature's rising
Over the border
People are leaving
Runnin' away from it all

Let's get away from law and order
I want to feel again like I did before
Let's drive away without delay
Across the feted border
I want to live again like I did before

There's so much more life outside
I've got nothing left to hide
Came to me just overnight
Leave the race and join the fight
What more do I have to say
I've got to get away
I've got to get away

Let's get away from law and order
I want to feel again like I did before
Let's drive away without delay
Across the feted border
I want to live again like I did before

There's much more to this
Much more than complete disorder
When you run for your lives
You've got to get across the border
Oh, listen to me closely
I've got to get away
I've got to get away

Let's get away from law and order
I want to feel again like I did before
Let's drive away without delay
Across the feted border
I want to live again like I did before

Let's get away [x2]
