

Another World

Modestep

You've got secrets in your eyes, just meet me one more time
I'm feeling things I've never felt before
[?] not so bright, outshines the city lights
You know it takes me to another world
Take me to

Holding on together
As we're lifted to the skies, [?]
'Cause it's you
Holding on together
It takes me to, it takes me to
It takes me to another world

Takes me to another world
Takes me to another world
Takes me to another
Takes me to another world
Switch

Takes me to, takes me to
Takes me to another world

This moment's [?]
And now I'm frozen in time, in here
Look into your eyes, feel the butterflies
'Cause it takes me to another world

Holding on together
Holding on together
Holding on together
Takes me to, takes me to
Takes me to another world
