

By My Side

Modestep

By my side
By my side
It's you and me against the world
When with you, life is special
With you by my side
It just all seems so right
With you right by my side
My world just comes alive
With you right by my side (By my side, by my side)
With you right by my side (By my side, by my side)
With you right by my side
With you right by my side
With you right by my side
Break it down

With you, you

When you're with me the smile stays with me
I can take life at my own time
With you by my side
It just all seems so right
With you right by my side
My world just comes alive
With you right by my side (By my side, by my side)
With you right by my side (By my side, by my side)
With you right by my side
With you right by my side
With you right by my side
Break it down

With you right by my side (By my side, by my side)
With you right by my side (By my side, by my side)
With you right by my side
With you right by my side
With you right by my side
