

# The Fallout

Modestep

They say the past is said and done  
But now I'm left in your wake, these awful mistakes are taking hold now  
You hurt me  
I'm pulling out the splinters from my heart  
These razor blades will pave the way and save me from the dark

This is just the fallout  
Of where we used to fall out  
This is just the fallout  
I'm wanting us to fall out  
Fallout, fallout, fallout, fallout, fallout, fallout

This is just the fallout  
This is just the fallout, fallout  
This is just the fallout, fallout

This is just the fallout  
This is just the fallout, fallout  
This is just the fallout, fallout

You hurt me I'm pulling out the splinters from my heart  
These razor blades will pave the way and save me from the dark
