

# Machine Punch Through

Moist

You came to rape me of my intellect  
I give you pieces off my pride  
Lay down naked and play with you  
Posing quietly looks a lot like me  
Your fucking pistols not so dangerous  
Stick it any place you please  
Rip me open cause you're dead inside  
What you thought you'd it looks a lot like me  
And you believe  
That I'll believe in  
All she said one little trick she said  
But it was lost on me  
Machine punch through  
All she said one little word she said  
But it was lost on me  
Machine punch through  
Punch through  
Another schoolboy goes to hell for it  
Believing everything he reads  
Sell my soul out one nickel at a time  
Turn the last page down I'm not far behind  
Your cigarettes become a torch for me  
Burning deep into arm  
Watch the welts rise come blistering through  
What you thought you'd see it looks a lot like you  
And you believe  
That I'll believe in  
All she said one little trick she said  
But it was lost on me  
Machine punch through  
All she said one little word she said  
But it was lost on me  
Machine punch through  
Punch through  
I'm bent out of shape  
Desperate to whine  
Screamin so loud that I don't make a sound  
Strung out on speed  
Maxed out on lies  
I know you're to blame but I can't see why  
You believe that I'll believe in you  
And its not so hard  
And you believe that I'll believe in you  
And its not so hard  
And you believe  
That I'll believe in  
All she said one little trick she said  
But it was lost on me  
Machine punch through  
All she said one little word she said  
But it was lost on me  
Machine punch through  
Punch through
