

Come and close your eyes
Let us synchronize
We can be higher
We can be bigger
Hold me through the night
Never been this high
We can be lighter
We can do better

Cause every time I look at you
I see myself, I see the truth
No matter what we do, no matter what we do

There's no me, there's only you
There's only you
There's only youniverse
We are the universe
There's no me, there's only you, you
There's only youniverse
We are the universe

Stars wrapped up in skin
The light comes from within
We can be brighter
We can be louder

Every time I look at you
I see myself, I see the truth
No matter what we do, no matter what we do

There's no me, there's only you
There's only you
There's only youniverse
We are the universe
There's no me, there's only you, you
There's only youniverse
We are the universe

You, youniverse, youniverse

Youniverse, there's only youniverse
There's only youniverse
We are the universe

Cause everything and everyone
We're all the same and all is one
You are me and I am you
