

Clue

Molly Tuttle

One, two, three
One, two, three

White noise on the radio
Thought I heard your voice but I was all alone
Been sailing so long now without your love
Thought I knew you, I could've been wrong
Did you fake the words to my favorite song?
And you jumped the ship when the going got rough

Well somebody told me
You were singing the blues
And I've tried not to care, babe
But I'm searching the airwaves for you
Just give me a clue

Just need someone to carry me home
I caught your signal and then it was gone
Are you out on your own now, lookin' up at the stars?

Well somebody told me
You were singing the blues
And I've tried not to care, babe
But I'm searching the airwaves for you
Just give me a clue

Send me a bottle
Rollin' on the tide
Write me a love song
Pass it down the wire
Or show me a rainbow
I'll know that it's you

Somebody told me
You were singing the blues
And I've tried not to care, babe
But I'm searching the airwaves for you
Just give me a clue
Just give me a clue
