## **Over & Over**

No I won't interfere I'm the only sound you'll ever need to hear Listen to my breath so near Allow me to be every noise in your ear

Since that day I wake up early Every morning which is good But my stomach's churning, call me, It would be nice if you could

Some days I question The suggestion You might not exist at all Can we meet and talk it over Would you be kind enough to call

Over and over It's over all over And over and over and over And over....

No there's no middle ground Your off in another story Or merry-go-round

No there'll be no measured terms You fly in the face of the way the world turns

Like a frozen tidal wave Since that day I'm standing still You brought me here and I accept Though you regret I never will

Just one sweet word And then a smile from you Is almost worth everything I've given all I had to give But you gave up giving in

You are everywhere I go All the places we have been I can't imagine where you are For you are all I've ever seen

Over and over....

All I've ever known All I've ever seen Places that I go Places that we've been Moloko
