I Know

Møme

I know you're watching me move
I know that I'm feeling you
Too late but not too
Tryna be where you are
I think you want me with you

Baby, bring it real close, we can do it right
Let me give you one dose of my summertime
I'm here, I'm yours for the night
Just a second, hold up, let me say it right

Don't wanna stop, don't wanna run away, oh
(I know, I know, I know)
Taking a shot, just let it ricochet, oh
(I know, I know, I know)
I just wanna be in the fire
I just wanna be in the fire
I just wanna be with you night and day
I just wanna be with you, I just wanna be with you

I know you're watching me move
I know that I'm feeling you
Too late but not too
Tryna be where you are
I think you want me with you

It's electric, I don't need to look away
Feel a spark, our bodies interlaced
I just wanna be in the fire
I just wanna be in the fire
I just wanna be with you night and day
I just wanna be with you, I just wanna be with you

In the end we're all just bodies
And everybody needs somebody
Endless nights of L.A. lights
You and me will be alright
I just wanna be your desire
I just wanna be in the fi-fire

In the end we're all just bodies
And everybody need somebody
Endless nights of L.A. lights
You and me will be alright
I just wanna be your desire
I just wanna be in the...

I know you're watching me move
I know that I'm feeling you
Too late but not too
Tryna be where you are
I think you want me with you

I know you're watching me move
I know that I'm feeling you
Too late but not too
Tryna be where you are

I think you want me with you

I don't wanna be in the fire
I don't wanna be in the fire
