

## My Attention

Møme

I don't know what to say, you got me feeling a way  
And I don't want it to change all night  
'Cause your eyes looking like stars, I follow you in the dark  
You put that beat in my heart all night

'Cause I don't wanna lose this point of view  
I could spend forever watching you  
I never want this high to fade away  
'Cause heaven opens every night to stay

You got my attention, I move in your direction  
Locked into the way you pull me closer to you  
You got my attention (all night), and all of my affection (all night)  
Focused on the forces that I'm feeling for you

You got my attention  
You got my attention

Take me deeper inside, show me where it all hides  
Make me earn it all night, all night  
Got me using my hands, got me making some plans  
Keep on doing that dance all night

'Cause I don't wanna lose this point of view  
I could spend forever watching you  
I never want this high to fade away  
'Cause heaven opens every night to stay

You got my attention, I move in your direction  
Locked into the way you pull me closer to you  
You got my attention, and all of my affection  
Focused on the forces that I'm feeling for you

You got my attention  
You got my attention

Took a while finding you, now I got my eyes on you  
Every single side of you  
Took a while finding you, now I got my eyes on you  
Every single side of you

You got my attention  
You got my attention, all of my attention  
You got my attention
