

Overview Effect 1972

Møme

You say my heart is like a a dark cloud
You say I'm flying far out
You know that I'm a night-owl and I might stay
Stay up, stay up, stay up on my moon
You're better, you're better in the sun

It might be all about
You can't love this astronaut
Though he would die for ya
Though he would die for ya
If I said I could change
And I would trade my nights for days
Then I would lie for ya
Then I would lie for ya

You can't reach this satellite
Forget your night, boy
Forget your night, boy
I can't change though I have tried
Forget your night, boy
Forget your night, boy

So now your heart is in the playoffs
We used share some nights-out
You used to love that trade off
Guess you've changed
Play-on, play-on, play-on, my love
Play-on, play-on
You're better, you're better in the sun

It might be all about
You can't love this astronaut
Though he would die for ya
Though he would die for ya
If I said I could change
And I would trade my nights for days
Then I would lie for ya
Then I would lie for ya

You can't reach this satellite
Forget your night, boy
Forget your night, boy
I can't change though I have tried
Forget your night, boy
Forget your night, boy

If you some day find a spaceship, I be here for ya
If you some day find a spaceship, I be here for ya
If you some day find a spaceship, I be here for ya
