

Virtual Reality

Momus

You can walk and you can talk in virtual reality
All you've got to do is dream
You can have whatever you want in virtual reality
All you've got to do is dream
Have virtually anything in virtual reality
Just do it
In moments when I want you
In moments when I want you so
All I've got to do is dream
In moments when I need you
In moments when I need you so
This is just like the real thing, only better
It's reality only better
In moments when I want you

In moments when I want you so
All I've got to do is dream
In moments when I need you
In moments when I need you so
What's real to me, what's make-believe
I don't even care any more
When I dream
When I dream, oh
In moments when I want you
In moments when I want you so
All I've got to do is dream
In moments when I need you
In moments when I need you so
All I've got to do is dream
All you've got to do is dream
