

Ain't It Sick

Mona

In the middle of the night you call
dont you know?
Im on my way
and the cost that payed
Oh
not much left, to show now, today
And you cant hide
that you're lovin' this feeling
And you cant hide it all
aint it sick how the sweet get bitter
aint it funny how you talk and talk
all things that made me remember
then you open your mouth and its gone
Aint it sick how the sweet get bitter
aint it funny how you talk and talk
all the things that made me remember
then you open your mouth and its gone
and we could have had it all
In another time
In another place
Well you loved, now you hit the floor
held so close
just a push away
And you cant hide that your loving this feeling
and you cant hide it all
Aint it sick how the sweet get bitter
Aint it funny how you talk and talk
All the things that make me remember
till you open your mouth and its gone
Aint it sick how the sweet get bitter
Aint it funny how you talk and talk
All the things that make me remember
till you open your mouth
and everything you ever said
I dont believe it
and every little thing you did
I dont believe it
and every little word we said
I dont believe it at all
aint it sick how the sweet get bitter
and it funny how you talk and talk
all the things that make me remember
till you open your mouth and its gone
Aint it sick how the sweet get bitter
And it funny how you talk and talk
All the things that make me remember
till you open your mouth and its gone
Aint it sick how the sweet get bitter
And it funny how you talk and talk
