

Alibis

Mona

Let me tell you straight
Look into my eyes, you know what I'll say
A burning at both ends
Candles in the night, I ain't got no shame

Now tell me where else would you go
In the morning we can fight
In the shadows of ourselves
A job is just a job, stay a little while

Leave but I know that you're wanting 'cause so am I
I know the morning is calling for alibis
Let the night be your covering from time to time
Leave but I know that you're wanting 'cause so am I

Oh, if we could be on and on we said
And never turn it off
When the spirit it moves me into you
Let's see what we got

Show yourself the way I wanna see
It's feeling like a crime
Lock me up for good
Throw away the key I'll do the time

Just let it go and stay a little while
No one will know what's on our minds
Just let it go and stay a little while
Just let it go

Leave but I know that you're wanting 'cause so am I
I know the morning is calling for alibis
Let the night be your covering from time to time
Leave but I know that you're wanting 'cause so am I

Leave but I know that you're wanting 'cause so am I
I know the morning is calling for alibis
Let the night be your covering from time to time
Leave but I know that you're wanting 'cause so am I
