

## Miss Understood

Monaleo

She's getting older  
She's getting colder and colder by the day  
She needs someone to hold her  
But nobody knows her besides her name  
Her name is Miss Understood  
Pleasure to meet her  
She's really a good girl  
You just gotta see her  
For who she is  
And not what she presents

She's got enough soul to save a robot  
Enough strength to carry the weight of the world  
Enough light for her to show off  
Enough love to heal a hurt little girl  
Miss Understood  
Miss Understood

She's getting wiser  
She's getting brighter as the sun shines down  
Eyes getting wider  
Heart of a fighter she will never lie down  
Her name is Miss Understood  
Hard on the outside, soft in the middle  
Sharp as a knife, but sweet as a skittle  
The warmest beast you will ever meet, yeah

She's got enough to soul to save a robot  
Enough strength to carry the weight of the world  
Enough light for her to show off  
Enough love to heal a hurt little girl  
Miss Understood
