

## Almost Human

Monarchy

Come be free don't be afraid anymore  
You and me, we'll cast off our burdens

Now, now we can smile for love  
Shine for eternity in our love  
All the riches of your heart are mine  
No one could better your design  
And you, you make me feel almost human

Dark was the road, tires spitting stones at us  
Falling down, we've been to bed with reckless

Nothing else matters with you in my world
