

# Goodnight London

Money

Fell in love with the night time  
She took me by surprise  
She had to turn the lights off  
To look me in the eyes

New york is winking at me  
He thinks I need a change  
So I go out and walk around  
In the early morning rain

To the sound of prowling cars  
And the sweepin' of broken glass  
Another midnight comes  
By the silent underpass

And every girl I've ever loved  
And every boy I've ever loved  
And every girl I've ever loved  
And every boy I've ever loved  
Close their eyes  
And say goodnight London  
Goodnight London (3x)

Even the ghosts must lay down their hands  
Just to stare into the gloom  
To ???open up to understand??? under the crying moon  
I'm singin' for all the south land  
So they can really scream  
I'm singing for the dreamer  
Sleepless with their dreams

And every girl I've ever loved  
And every boy I've ever loved  
And every girl I've ever loved  
And every boy I've ever loved  
Will close their eyes  
And sing goodnight London  
Goodnight London (3x)
