

We were great enemies
Cause of mad world disease
Longing for sympathy
Somberland we come
One track minds - on one way streets
House the poor refugees
Clemency is what we came for

Ref.:

Somberland we come
Night falls on our minds
Make us numb and blind
'cause there's nowhere else to go to
Somberland we come
Gather all your lambs
Make this torture end
'cause there's nowhere else to go to
Somberland we come

No good god - no belief
We did so unworthy
Arrogance - our defeat
Somberland we come
It's destroyed what we had
We're alive - dreams are dead
Let's admit we failed test now

Ref.:

Somberland we come
Night falls on our minds
Make us numb and blind
'cause there's nowhere else to go to
Somberland we come
Gather all your lambs
Make this torture end
'cause there's nowhere else to go to
Somberland we come
