

## We Will Burn

Monolord

Running and screaming  
From this cold and dying world  
My heart is bleeding  
You killed Mother Earth

You have nothing to offer  
Turned your back on us all  
Treatment of silence  
When we burn it's your fault

Yeah, we blew it all  
Yeah, we blew it all  
We're in the hands of fools

We're dying in darkness  
In decay and endless nights  
Our future is resting  
In the hands of fools

Yeah, we blew it all  
Yeah, we blew it all
