MONSTA X

Long nights, two bodies
Daylight, not stopping
Locked in the rear view
The rear view yeah

Soft pressure, hard talk
So good, never wash you off
Still in it, the rear view
Caught up watching everything about you

Who loves you lately
Don't say it baby
Running outside but it ain't right
Falling back in like it's no lost time just

Kissing these lips
Got me on ten
Keeping these hips
Give me notice
Baby don't quit
Don't ever doubt this
Give me this
Just say you want this
Baby this, just give me all this

Kissing your lips
So twisted in your mind
Only want this
Gimme closeness every night
Only want this
Gimme this this this
I just want this, give me this this this

Familiar, old sounds
New places, same house
Locked in, I can't move
Remember everything about you

Who loves you lately
Don't say it baby
Running outside but it ain't right
Falling back in like it's no lost time just

Kissing these lips
Got me on ten
Keeping these hips
Give me notice
Baby don't quit
Don't ever doubt this
Give me this
Just say you want this
Baby this, just give me all this

Kissing your lips
So twisted in your mind
Only want this
Gimme closeness every night

Only want this
Gimme this this this
I just want this, give me this this this

Kissing these lips
Got me on ten
Keeping these hips
Give me notice
Baby don't quit
Don't ever doubt this
Give me this
Just say you want this
Baby this, just give me all this

Kissing your lips
So twisted in your mind
Only want this
Gimme closeness every night
Only want this
Gimme this this this
I just want this, give me this this this
