

now (in space)

Montaigne

Nothing is the same
Ever since you came, yeah I
I kinda feel insane, but I'm
Not afraid, the kind of thing
Where it feels too good

Now you're far away
But I gotta stay, cause I
I'm watching space, and I
I just wanna say, I wanna say baby

I love you too much, it'll never be enough
I wake up in the morning yearning for your love
Ooh, I'm obsessed with the rush
Baby, you're my favourite and you'll always be my crush
Please
Tell me that you want me
And exactly how
Tell me how you'll kiss me when I touch down
I don't wanna be away, yeah I wanna be found
Yeah, I want you now, now, now

Everything has changed
Think about you all the time
All the time
Wish I could kiss you now
Kiss you good, somehow

Dreaming of embrace
Flying through the starry sky
I can be the moon in your eye
Moon in your eye
No, I can't have you now, I

I love you too much, it'll never be enough
I wake up in the morning yearning for your love
Ooh, I'm obsessed with the rush
Baby, you're my favourite and you'll always be my crush
Please
Tell me that you want me
And exactly how
Tell me how you'll kiss me when I touch down
I don't wanna be away, yeah I wanna be found
Yeah, I want you now, now, now

Yeah, I want you now
Yeah

I love you too much, it'll never be enough
I wake up in the morning yearning for your love
Ooh, I'm obsessed with the rush
Baby, you're my favourite and you'll always be my crush
Please
Tell me that you want me
And exactly how
Tell me how you'll kiss me when I touch down
I don't wanna be away, yeah I wanna be found

Yeah, I want you now, now, now
Yeah, I want you now, now, now
