

## Admit Defeat

## Monuments

We try to outrun the process  
Try to outrun the gun  
There's no escaping a new awakening  
Conflicted in everyone  
They drip feed up answers  
What next will they crave?  
They're wrecking a future for all  
There's no escape

Admit defeat

Explain yourselves  
You're sacrificing life for your own gain  
In a prison with no bars  
Empty vessels and broken hearts  
No one knew  
That we would go this far  
It makes no sense  
To go on

I can see no other way out of here  
We are the lost in a world full of fear  
Blind to injustice extracting life  
Birth and death get twisted  
Born in chains

Well they tried to take back my memories  
Tried to take back myself  
There's no forgiveness for mutilation  
They're caging in everyone  
They make all the rules  
Yeah it's all just a game  
They're wrecking a future for all  
And human waste

I can see no other way out of here  
We are the lost in a world full of fear  
Blind to injustice extracting life  
Birth and death get twisted  
Born in chains
