

Hollow King

Monuments

Time, I didn't know that you cared
Reach out, behold a god that bleeds
You can't find the common sense
Instead you command it to break
Does it make it right?
You'll make it right
No

I can't believe that they would die for you
I can't believe they would come and bow down to you
Close to the trigger
Hand on the fall
We can't continue

Make them change
Imagine the world again
They can't move
You'll change

Blood of the roe is thicker than your water
You can't imitate life, it's not a trick

Now we'll make them change
Imagine the world again
They can't move
Change
Imagine the world again

None can move
There's something wrong with you and me
(Something's wrong with me, with you
And none won't be found)
Lift you up
We'll lift you up
They'll drag you down and we'll lift you up

Make them change
Imagine the world again
They can't move
Make them change
Imagine the world again
They can't move

There's something wrong with you
Your god would know
Just how the state will fall
These people that are taken
Never got to see the gold
