

Unless
You would doubt me for
Progress
Don't keep asking me to stay behind and wait
You come around shaking the same chains
Now who's got the finger at you?
Blame it all on the devil

I'll remain here
Alive in despair coming down
Around the void
I'll remain here
Deep down in the hole where I belong
And now I know
I know where to go!

Fuck it
Fuck it all
Make me stay behind and wait
Don't come around shaking the same chains
Now who's got the finger at you?
The price you pay to pull away and blame it all on yourself
And do nothing to change
What is it that you can lose?
Someone to take it from you
The problem isn't new
Time continues
If you survive it, then you'll make it through
(We're through)
(I know we're through)

I'll remain here
Alive in despair coming down
Around the void
I'll remain here
Deep down in the hole where I belong
And now I know
I know where to go!
